Intuition Case Studies

Third-Party Training

Training external audiences can be difficult and costly and if not done properly creates a real compliance risk. Our 3rd party training solutions provide a seamless and efficient platform for you to deliver targeted training to your 3rd parties across desktop and mobile.
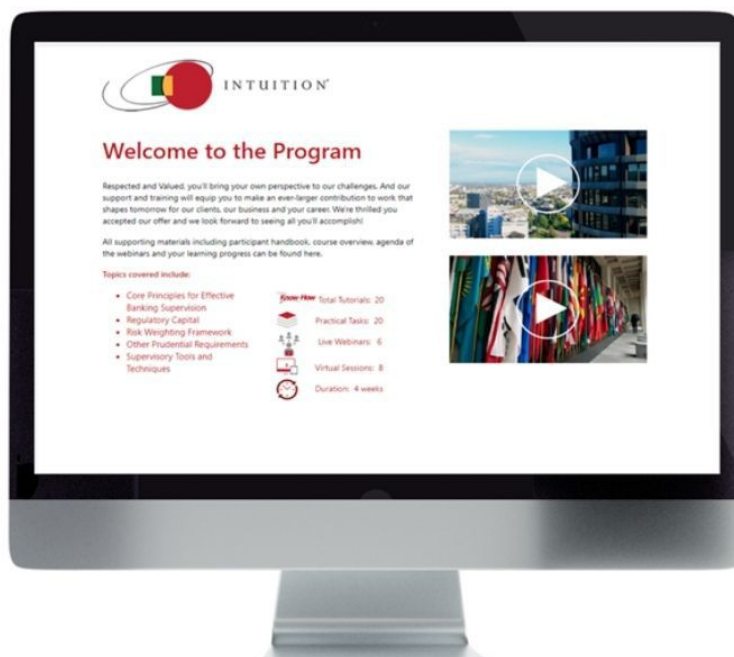

The Challenge

How to deliver government mandated Corporate Integrity Agreement training to 3rd party contractors ensuring on time completion and adherence to CIA requirements.

The Solution

Intuition delivered an end to end **3rd Party Training Solution** combining technology and managed services to provide simple access to required trainings and ensure that all training was completed on time and to the standards mandated by the CIA avoiding large fines for the customer.

A simple to use web-based portal addressed the difficulty in delivering mandatory compliance training to 3rd parties without an excessive support overhead. The intuitive and straightforward design of the site and access to the content enabled us to ensure that the customer met their CIA 3rd party training requirements within exceptionally tight time frames.

In addition, 3rd party administration features were added to enable vendors to add their users, attest to screening requirements and generate reports related their own users. A full managed service was provided to onboard new vendors and support users through the process and ensure on time completions. Custom reporting was designed to meet OIG requirements for the exact details of the CIA.
